

Patient Evaluation for Hereditary Pancreatitis Genetic Testing

Evaluation and testing protocol

- 1) Are the criteria for HP testing¹ satisfied?
 - a) Clinical details: Ideally, early-onset recurrent pancreatitis.
 - b) Family history: Ideally, one or more first-degree relatives or two or more second-degree relatives.
- 2) Genetic testing.
 - a) PRSS1: Exons 2, 3 and 4
 - b) SPINK1: Exons 1 and 3

Review of clinical findings and genetic testing results.

Decision made re further testing. e.g.. CFTR, PRSS2 (includes possibility of sending samples away to, for example, Ambry Genetics, Aliso Viejo, CA, USA).

¹ See document, Guidelines for Hereditary Pancreatitis Testing.
