

## Price Increase for Laboratory Testing

---

Valued Clients,

Canterbury Health Laboratories (CHL) wishes to advise that there will be a price increase applied this year. With costs continuing to increase, this cannot all be internally absorbed and therefore a 2.5% price increase is to be applied to any externally referred or ineligible patient testing performed at CHL.

We are awaiting confirmation from laboratories who we refer testing to as to the price adjustments that will apply, therefore some individual tests may differ, as any increase imposed from these laboratories will be reflected in the price.

This increase will apply to all testing invoiced after the 1<sup>st</sup> July 2022 onwards.

Some contracts will not be impacted by this price adjustment, but if you are unsure please do not hesitate to contact me.
