* Tested on 10- 30 isolates

^a *S. aureus* susceptible to methicillin/flucloxacillin denotes susceptibility to ceftazolin and amoxicillin-clavulanate

^b Enterococcus species are intrinsically resistant to cephalosporins

^c Includes Intermediate (Susceptible, Increased Exposure) results

^d Treatment of uncomplicated urinary tract infections only

Use requires patient-specific Infectious Diseases/Clinical Microbiology approval (document this in the clinical notes) unless following a CDHB antimicrobial guideline e.g. 'The Pink Book'.

\$ Use requires patient-specific Infectious Diseases/Clinical Microbiology/Respiratory Specialist approval (document this in the clinical notes) unless following a CDHB antimicrobial guideline e.g. 'The Pink Book'.

Colour Interpretation

≥ 90% Susceptible

70 - 89% Susceptible

< 70% Susceptible

R= Intrinsically Resistant

No data or not tested
